<b>Description</b>		
<p>In the print composer, I make a wonderfull layout.</p> <p>Then I try to export it (the format doesn't matter, the problem exists with all of them).</p> <p>When I export my map in jpeg (for example), and when I oppen the file, the size of the symbols is totally different from what I saw on the composer.</p> <p>The symbols are bigger, and so the readability is modified.</p>
