

## QGIS Application - Feature request #9338

### Allow to select size of export image in Project > Save as Image.

2014-01-14 06:23 PM - baditaflorin -

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Browser	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 17941
<b>Description</b>	
<p>This is real useful because this is the only way in Qgis to save a geo-referenced image, more exactly to get a world file with a image.</p> <p>but the image that is save is the screen resolution, so is not useful if i want to save a 5000x4000 px image to overlay on something in JOSM or other programs :)</p>	

#### History

##### #1 - 2014-01-30 11:34 PM - Paolo Cavallini

- Target version changed from Version 2.0.0 to Future Release - High Priority

##### #2 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No

##### #3 - 2018-04-18 04:10 AM - Harrissou Santanna

- Resolution set to fixed/implemented

- Status changed from Open to Closed

- Description updated

Should be fixed in <http://github.com/qgis/QGIS/pull/4390>
