

QGIS Application - Bug report #936

Legend name too long when executing "qgis vectorfile.shp"

2008-02-04 05:06 PM - cgs_bob -

Status:	Closed	
Priority:	Low	
Assignee:	Redmine Admin	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10995
Description		
Displaying a vector layer by specifying a vector file on the command line displays the vector and the complete file path as the name in the legend. If I work in a deeply nest directory, this name can be very long. It would be great if the legend name is the basename of this long path.
