

QGIS Application - Feature request #9372

More uniform CRS selector

2014-01-19 11:56 PM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 17972
Description		
<p>CRS selector is different in many dialogs. See e.g. Save as... dialogs for raster and for vectors.</p> <p>The raster solution seems better (Anita Grazer):</p> <ol style="list-style-type: none"><li>1. The raster solution has only one dropdown box where the vector solution needs a dropdown and a text box;</li><li>2. The vector solution is confusing because the CRS name in the (greyed out) text box is not updated when the user changes between layer, project, and selected CRS.</li></ol> <p>I think we should use the same selector throughout, e.g. Layer&gt;New&gt;New shapefile layer, New spatialite layer, Layer properties&gt;General, etc.</p>		

History

- #1 - 2014-01-20 01:47 PM - Giovanni Manghi
- Target version set to Future Release - Nice to have
- #2 - 2015-01-18 10:57 PM - Nyall Dawson
- Resolution set to fixed/implemented
  - Status changed from Open to Closed

Should be all fixed now - please file separate bugs if you find any dialogs which aren't using the new crs selection widget.
