

QGIS Application - Feature request #9372

More uniform CRS selector

2014-01-19 11:56 PM - Paolo Cavallini

Pull Request or Patch supplied:		Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 17972
Description CRS selector is different in many dialogs. See e.g. Save as... dialogs for raster and for vectors. The raster solution seems better (Anita Grazer): 1. The raster solution has only one dropdown box where the vector solution needs a dropdown and a text box; 2. The vector solution is confusing because the CRS name in the (greyed out) text box is not updated when the user changes between layer, project, and selected CRS. I think we should use the same selector throughout, e.g. Layer>New>New shapefile layer, New spatialite layer, Layer properties>General, etc.		

History

#1 - 2014-01-20 01:47 PM - Giovanni Manghi

- Target version set to Future Release - Nice to have

#2 - 2015-01-18 10:57 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Should be all fixed now - please file separate bugs if you find any dialogs which aren't using the new crs selection widget.
