

QGIS Application - Feature request #9486

Editing Layer Labels in Composer Legends by Double-Clicking

2014-02-04 01:22 AM - mathieu rajorison

Status: Closed	
Priority: Low	
Assignee:	
Category: Map Composer/Printing	
Pull Request or Patch Supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 18077
Description	
<p>In the composer, the edit button is close to the delete button so that it can lead to delete a layer label instead of editing it (for the users that are not skilled with their mouse), especially when you have to edit layer labels a large number of times.</p> <p>Also, one might be tempted to double click on the layer item to edit its label but it is not active. Why not authorizing it ? It would also prevent fails with the edit button.</p>
