

QGIS Application - Feature request #9488

Rounded frames in the composer

2014-02-04 01:29 AM - mathieu rajerison

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Pull Request or Patch supplied:	No	
Easy fix?:	No	Resolution: fixed/implemented
		Copied to github as #: 18079
Description		
<p>If you want some rounded frames in the composer, you have to import an SVG or an image of it.</p> <p>It would be nice to apply rounded edges on frames directly from the Label parameters.</p>		

History

Hi Mathieu, this is Mathieu :)

See a recent issue I filed on this: #9479

Maybe this could be closed as duplicate of the above. As for a work around on rounded edge, you can - under upcoming 2.2 - now use a basic rectangle shape and style it using outline: simple line symbology to get rounded corners (or straight corners, for that matter).

#2 - 2014-02-04 07:12 AM - mathieu rajerison

okay Mathieu.

I had checked before posting but searched for "rounded" but not "round" word. So I hadn't seen the previous issue.

Sorry :)

#3 - 2014-04-18 01:45 AM - Nyal Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Think this can be closed now - master has the ability to draw rounded rectangles, and control the join style of item frames (bevel/miter/round).
