<b>Description</b>	
Just updated to qgis 2 with osgeo4w. Installer seemed to go fine, but no shortcuts were placed on the desktop or in start menu.	
Runs fine from the .bat files in the osgeo4w\bin

Should this be at OSGeo4W trac for issues? Not sure if this is a QGIS issue.

- Target version deleted (Version 2.0.0)
- Status changed from Open to Closed

Please let the OSGeo4W package maintainers know about this - they should be able to fix it.
