### History

#### #1 - 2014-02-12 07:07 AM - Jürgen Fischer

No file attached.

#### #2 - 2014-02-12 07:07 AM - Jürgen Fischer

- Status changed from Open to Feedback

#### #3 - 2014-02-12 10:30 PM - Paolo Cavallini

- File test.zip added

Oops, sorry. Here it is.

#### #4 - 2014-06-23 05:52 AM - Giovanni Manghi

- Affected QGIS version changed from 2.0.1 to master
- Target version set to Future Release - Lower Priority
- Status changed from Feedback to Open
- Subject changed from DXF created with QGIS is not loaded back to DXF does not loads if file extension is missing

If the file has the extension it load correctly, if it does not then

Invalid Data Source: /home/giovanni/Desktop/test is not a valid or recognized data source

#### #5 - 2015-04-09 06:04 AM - Paolo Cavallini

- Subject changed from DXF does not loads if file extension is missing to DXF does not load if file extension is missing

#### #6 - 2015-06-11 02:19 PM - Jürgen Fischer

- Target version changed from Future Release - Lower Priority to Future Release - Nice to have
- Resolution set to up/downstream

- Priority changed from Normal to Low

```
$ ogrinfo test
Unable to open datasource `test' with the following drivers.
-> ESRI Shapefile
[...]
-> SXF
$ ogrinfo test.dxf
INFO: Open of `test.dxf'
      using driver `DXF' successful.
1: entities
```

Apparently a "problem" of the OGR driver.

**#7 - 2015-06-12 12:31 AM - Paolo Cavallini**

- Status changed from Open to Closed
- Resolution changed from up/downstream to invalid

Renaming the file solves the issue:

```
ogrinfo test.dxf
INFO: Open of `/home/paolo/Scrivania/butta/qgis_test/test.dxf'
      using driver `DXF' successful.
1: entities
```

Forwarding it upstream.  
Thanks.
