

QGIS Application - Bug report #9561

Unable to save an existing template in composer

2014-02-13 07:19 PM - Tim Sutton

Status: Closed	
Priority: Normal	
Assignee: Nyall Dawson	
Category: Map Composer/Printing	
Affected QGIS version: 2.0.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 18147

Description

I have a template that I need to edit (using QGIS Master commit:dae8ea66a169db7539a08dc81d2ebe9dab789f37).

Although I am able to create and save new templates (as .qpt), I am not able to save edits to my existing template. When I click the save as template icon, the QGIS main window is refocused but and no save as dialog appears.

I am attaching the template and a short screencast that illustrates the issue, and an example template that I have the issue with.

- Status changed from Open to Feedback

I can't replicate this. It may be OSX specific...? Can you test under a different platform?

#2 - 2014-04-20 03:25 PM - Nyall Dawson

Tim - is this still reproducible?

#3 - 2014-06-14 02:30 AM - Tim Sutton

- Status changed from Feedback to Closed

Closing this out - I no longer have OSX so cant verify if the issue persists.
