

## QGIS Plugin Site - Bug report #9595

### Encode ampersands in the xml repo output

2014-02-18 08:48 AM - Borys Jurgiel

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Alessandro Pasotti	
<b>Category:</b>	
<b>Pull Request or Patch supplied:</b>	
<b>Description</b>	
<p>If there is an ampersand in the author_name tag (or any other except the description), it's passed to the xml output without any encoding, what leads to a corrupted xml. I've just made a fast workaround in the plugin installer by replacing all "&amp; " with "&amp; " in the downloaded xml, however, a similar replace on the server side would prevent from publishing corrupted XMLs at all.</p> <p>See: #9524.</p>

Works perfectly, thanks!

Btw. I leave the workaround in the installer for external repositories though.
