QGIS Application - Bug report #9606 QWC fails silently if project doesn't have "service capabilities" checked

2014-02-19 11:25 PM - Voytek Lapinski

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	QGIS Server			
Affected QGIS version:2.0.1		Regression?:	No	
Operating System:		Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:	invalid	
Crashes QGIS or corru pits data:		Copied to github as #: 18183		
Description				

Moved from #9605 as a server not a client issue.

If the project doesn't have "service capabilities" checked, QGIS server still issues a valid GetCapabilities/GetProjectSettings response. QWC then fails silently without issuing a GetMap request.

See http://www.mail-archive.com/qgis-user@lists.osgeo.org/msg23649.html

Reading the docs <u>http://docs.qgis.org/2.0/en/docs/user_manual/working_with_ogc/ogc_server_support.html</u> it is not clear what is the expected behavior: the docs state that checking "Service capabilities" option allows you to specify OWS capabilities such as "title", "description" etc., while if you don't check it, wms_metadata.xml file located in the cgi-bin folder will be used instead.

It seems that the expected behavior is that a GetProjectSettings should return all necessary details (reading from wms_metadata.xml) even when "Service capabilities" is not checked.

- Resolution set to invalid

- Status changed from Open to Closed

Ok, I've digged into the code and I can conclude that this problem is not related to the server: it's more like a QWC and/or a documentation problem.

This is what happens:

1. if "Service capabilities" is checked then everything works fine and Service tag is present

2. if "Service capabilities" is not checked and the cgi-bin direcrory contains "wms_metadata.xml" then everything works fine and **Service** tag is present (with values taken from wms_metadata.xml)

3. if "Service capabilities" is not checked and the cgi-bin direcrory does **not** contain "wms_metadata.xml" then the **Service** tag is missing and QWC fails without complaining
