<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 18190
<b>Description</b>	
<p>I have a lot of layers with a very long and coded name. These names are quite the same except a letter or a number inside it.</p> <p>In the set snapping option dialog is hard to know which layer choose.</p> <p>So i tried to set an alias but in the dialog is reported the original name.</p> <p>I think is easy to put the alias name if setted or report name and alias together.</p> <p>TIA</p>
