

QGIS Application - Bug report #9642

map overview pane fails to update when {opening,creating} a project from an existing project session

2014-02-24 06:16 PM - Mathieu Pellerin - nIRV

Status: Closed	
Priority: Severe/Regression	
Assignee: Martin Dobias	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 18214
Description	
Steps to reproduce: <ol style="list-style-type: none">1. Create a project2. Add one vector layer3. Right click on added vector layer and activate '[x] show in overview'4. Without exiting qgis, create a new project (Project > New), no need to save the current project5. When the new project is created, the map overview pane will still show the overview of your former project	
It's a regression on the qgis master build which does <i>not</i> affect qgis 2.2, flagging this as being a multi-threading rendering regression.	
There's also a map overview extend issue, but I've yet to come up with a minimal project that shows the issue, working on it.
