

QGIS Application - Bug report #9670

qgis composer map item background setting and/or rendering broken

2014-02-26 06:14 PM - Mathieu Pellerin - nIRV

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 18237
<b>Description</b>		
<p>In qgis master (2.3), the map item background is also rendered a opaque white, regardless of whether the user set a different background color, or disabled background rendering by unchecking [ ] background. It's a regression from qgis 2.2.</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none"><li>1. Open the map_item_background_broken project</li><li>2. Open the composer</li><li>3. The upper map item has a yellow background set, yet it renders as white</li><li>4. The lower map item has its background rendering disabled, yet a background is rendered, also white</li></ol> <p>I'm less sure it's a regression from the MT rendering merge, but can't see what else would have triggered this.</p>
