

QGIS Application - Bug report #9670

qgis composer map item background setting and/or rendering broken

2014-02-26 06:14 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 18237
Description		
<p>In qgis master (2.3), the map item background is also rendered a opaque white, regardless of whether the user set a different background color, or disabled background rendering by unchecking [] background. It's a regression from qgis 2.2.</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none">1. Open the map_item_background_broken project2. Open the composer3. The upper map item has a yellow background set, yet it renders as white4. The lower map item has its background rendering disabled, yet a background is rendered, also white <p>I'm less sure it's a regression from the MT rendering merge, but can't see what else would have triggered this.</p>
