## QGIS Redmine (QGIS bug tracker) - Support #9741 SSH key upload and management is missing

2014-03-07 09:45 AM - Alex Mandel

Status: Start date: 2014-03-07 Open **Priority:** Severe/Regression Due date: Assignee: % Done: 0% Category: **Estimated time:** 0.00 hour Target version: Pull Request or Patch supplied: Tag:

## **Description**

At some point the ability to manage keys for a user vanished. So new users can't upload their ssh key and existing users can't modify theirs. This mean new plugin authors can't store their code on hub, which has been requested. http://osgeo-org.1560.x6.nabble.com/uploading-plugin-files-to-hub-qgis-org-td5107396.html

Did someone remove the Redmine Gitosis plugin or was Gitosis broken on a server update? Was this server space related?

## **History**

## #1 - 2014-03-28 10:39 AM - Alex Mandel

- Priority changed from High to Severe/Regression

This bug prevents plugin authors from keeping their code on hub.
