Dot sure what you mean, where do you start from? Raster/vector properties or style manager? Which color ramps, cpt-city, gradient, etc?

perhaps a screenshot would help.

This is how they look like in Debian. On Win (64 bit at least, I believe - sorry, no win machine here for further testing) no text like:

cb/div/BrBG_07

Apache-style (2002)

etc.
