

QGIS Application - Bug report #9809

xls / xlsx field names are imported as first line

2014-03-18 08:49 AM - Regis Haubourg

Status: Closed	
Priority: High	
Assignee:	
Category: Data Provider/OGR	
Affected QGIS version: 2.2.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: not reproducible
Crashes QGIS or corrupts data:	Copied to github as #: 18345
Description	
<p>Hi, In master and 2.2, xls and xlsx field names are imported as first line. To me, it is a blocker, even if I don't mark it so. I probably will have to downgrade to 2.0 here. Backport more than welcome. This is probably related to OGR_XLSX_HEADERS option.</p>	

History

#1 - 2014-03-24 06:25 AM - Alexander Bruy

Sometimes field names imported correctly, but I can't find any dependency

#2 - 2014-06-20 06:28 AM - Regis Haubourg

Hi,
a user raised that when explicitly defining field names line as text in spreadsheet software solves the issue.
Hope that helps
Régis

- Category changed from Data Provider to Data Provider/OGR

#4 - 2016-10-07 03:38 AM - Even Rouault

- Status changed from Open to Feedback

@regis Is the issue still uptodate ? Is there any file to reproduce you could attached ?

#5 - 2017-01-04 05:21 AM - Giovanni Manghi

- Status changed from Feedback to Closed

- Resolution set to not reproducible

I can't find an example it does not work as expected in a recent qgis release (2.14 or 2.18 with gdal 2.*).

Closing for lack of feedback, please reopen if necessary.

Hi sorry for the lag again, I quit my previous work and do not have test data anymore. I suspect the issue is not there anymore anyway.
