<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 18361

**Description**

J'utilise la version 2.0, je suis incapable d' "exporter" une carte en fichier format PDF, JPG, PNG Btmp... le composer ne fait rien, j'ai le choix du dossier et c'est tout.

I use qgis 2.0, I can't export a map in PDF, JPG, PNG, Btmp format. The map composer juste offer the file where i would like to export.

I use Windows 7

Do you still see this same issue in 2.3 master version? If so, can you provide more details on how to reproduce this issue?

#### #2 - 2014-07-03 12:20 PM - Antonio Locandro

Had this issue right now, in 2.2 it happens if Print as Raster option is selected, it just creates the name of the file. If this option is deselected then it works

#### #3 - 2014-07-03 02:23 PM - Nyal Dawson

Antonio - how large is your composition and what resolution are you exporting it in? Are you using the 64 bit windows build?

and what about 2.4?

#### #5 - 2014-08-09 03:15 PM - Antonio Locandro

I haven't tried it but <https://twitter.com/Santixs/status/498168966326804480> apparently the issue still remains

**#6 - 2014-10-11 07:29 AM - Giovanni Manghi**

- *Resolution set to worksforme*

- *Status changed from Feedback to Closed*

Closing for lack of feedback, please reopen if necessary.

Try qgis 2.4/master 64bit.
