

QGIS Application - Bug report #9853

HTTPS doesn't work through proxy

2014-03-24 04:51 AM - Guillaume SUEUR

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WMS	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18382
Description		
<p>When using a WMS server with both HTTPS and proxy settings, the connection doesn't work. At some point I think QGIS doesn't use the proxy settings after establishing the HTTPS connection. The first messages (tracked by Wireshark) look OK, but after, nothing happens.</p>

Maybe this bug is related, too: #3844

I think that QT4 is not too good dealing with operating system internet settings.

See the code of the python plugin fetcher (at least in Qgis 1.7/1.8): it doesn't use the QT network module, but the normal python network module, that is working.

#2 - 2014-03-24 05:57 AM - Guillaume SUEUR

Not sure. #3844 doesn't deal with HTTPS, but I guess having to manage two login/password couples (one for the proxy, the other for HTTPS authentication) may drive QGIS a little bit nuts...

In 2.0 it does.

Hi,

When you indicate you closed that bug, are you talking about this very one ?

Thanks

Guess so.

#7 - 2014-04-30 03:36 AM - Guillaume SUEUR

OK, that sounds great. Thanks
