

QGIS Application - Feature request #9859

Processing - "Mean coordinate(s)" should not require id fields

2014-03-24 10:38 AM - Anita Graser

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 18387
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
The mean coordinate(s) tool currently does not offer a way to just calculate the mean coordinates of all points in a layer if they do not have a common group/class id.

Seems like the optional setting for ParameterTableField isn't working. All of the algorithms which try to use this option end up with required fields.

#2 - 2014-11-29 02:43 AM - Alexander Bruy

- Status changed from Open to Feedback

Seems fixed in master, please test

#3 - 2014-11-29 06:17 AM - Anita Graser

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

Thanks, seems fixed.
