

QGIS Application - Bug report #988

PostGIS: allow NULL in numeric columns

2008-03-12 03:32 PM - Maciej Sieczka -

Status: Closed	
Priority: Low	
Assignee: Jürgen Fischer	
Category: Data Provider	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11048
Description	
Related to #987:	
1. Edit a [[PostGIS]] table cell in a numeric column trying to make it NULL. Save changes.	
Error:	
ERROR: invalid input syntax for type double precision: ""	
Same happens at saving changes when quitting digitizer.	
Is there a reason QGIS doesn't allow null numeric table cells?

The problem with saving the null values is when sending the INSERT or UPDATE statement to the [[PostgreSQL]] database the value is quoted, which is okay for numbers and must be for special values like 'NaN' or 'Infinity', but quotes with zero or more spaces is not accepted. The value needs to be NULL (no quotes) or the comma separators with nothing but whitespace between.
