QGIS Application - Bug report #988
PostGIS: allow NULL in numeric columns

2008-03-12 03:32 PM - Maciej Sieczka -

Status:	Closed			
Priority:	Low			
Assignee:	Jürgen Fischer			
Category:	Data Provider			
Affected QGIS version:			**Regression?:**	No
Operating System:	All		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed
Crashes QGIS or corrupts data:			**Copied to github as #:**	11048

Description

Related to #987:

1. Edit a [[PostGIS]] table cell in a numeric column trying to make it NULL. Save changes.

Error:

    ERROR: invalid input syntax for type double precision: ""

Same happens at saving changes when quiting digitizer.

Is there a reason QGIS doesn't allow null numeric table cells?

The problem with saving the null values is when sending the INSERT or UPDATE statement to the [[PostgreSQL]] database the value is quoted, which is okay for numbers and must be for special values like 'NAN' or 'Infinity', but quotes with zero or more spaces is not accepted. The value needs to be NULL (no quotes) or the comma separators with nothing but whitespace between.
