

QGIS Application - Bug report #9891

QGIS hub has bad performance

2014-03-26 06:59 AM - Noone Noone

Status: Rejected	
Priority: High	
Assignee:	
Category:	
Affected QGIS version: 2.2.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: invalid
Crashes QGIS or corrupts data:	Copied to github as #: 18410
Description	
Hi, the redmine speed is pretty slow and needs to be improved. Nobody wants to add/review/edit tickets or the wiki when each request takes 10...20secs :(

History

Could it be caused by email notification delivery?

<http://www.redmineblog.com/articles/asynchronous-email-delivery/>

#2 - 2014-03-26 08:03 AM - Noone Noone

This installation seems to be from 2010, so I guess there are a lot of outdated parts. I tip on the shared hosting of a lot of projects, but I'm not an admin ;)

#3 - 2014-03-27 07:40 AM - Alexander Bruy

- Resolution set to invalid

- Status changed from Open to Rejected

This issue should be reported in Hub tracker <https://issues.qgis.org/projects/qgis-redmine>

#4 - 2014-03-27 10:57 AM - Noone Noone

If I submit the new issue there, I get a 503 when I send the new ticket :/
