

QGIS Application - Bug report #9895

In python console, input() raises EOFError

2014-03-26 07:22 AM - pierre krmr

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 18412
Description Just type "input()" in the Qgis console : input() Traceback (most recent call last): File "<input>", line 1, in <module> EOFError: EOF when reading a line What it should do : input() then i type something + enter 'then i type something + enter' I need it for a script to ask the user for some string data (like Y/N choices, new parameters depending on partial results after a first process step, etc...)
