

QGIS Application - Bug report #9948

Composer, grouped objects, disable item properties

2014-03-30 01:59 AM - Giovanni Manghi

Status: Closed	
Priority: Low	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: end of life
Crashes QGIS or corrupts data:	Copied to github as #: 18449

Description

When grouping objects the "item properties" tab remains active, but when grouped objects are selected then tab shows the properties of the last ungrouped object that was selected, and it can be confusing.

Another suggestion would be to use a frame with a particular style to show the extent of a particular set of grouped objects,
