

QGIS Application - Bug report #9986

saving style in layer_styles table in postgres for layers without geometry

2014-04-03 05:22 AM - Jan Van Bennekom-Minnema

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 18479
Description		
<p>Loading layer styles from *.qml files and the postgresql table "layer_style" is offered through "Layer Properties"/button "Load Style..." (option "load from file" and "load from database"), however saving a style [which also contain Edit Widgets and Aliases] for a layer without geometry through "Layer Properties"/button "Save Style..." is only offered to *.qml file? The options "SLD file" and "Save in database (postgres)" are not available. If loading a style (without geometry) from a database is supported, saving to a database should also be possible?</p>		

History

#1 - 2014-06-28 07:36 AM - Jürgen Fischer

- Target version changed from Version 2.2 to Future Release - Lower Priority

#2 - 2017-05-01 01:08 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#3 - 2019-03-09 03:12 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
